

LIVE WELL . LEARN WELL

HealthPRO
Mission

Good health is where better learning begins.

A structured school health programme that helps identify concerns early, keeps parents informed, and gives schools a clearer picture of student well-being.

COMPREHENSIVE STUDENT HEALTH SCREENING.
DELIVERED RIGHT AT YOUR SCHOOL.

- General Health
- Dental Health
- Eye Health

A clearer picture of every child's health.

Children do not always recognise or communicate a health concern themselves. Poor vision may go unnoticed. A dental issue may not hurt yet. Growth concerns, allergies, breathing difficulties, or other health conditions can sometimes remain undetected until they begin affecting a child's comfort or everyday life.

HealthPRO Mission partners with schools to bring structured preventive healthcare directly to students, on campus and during the school day.

Our programme is designed around one simple principle:
Identify early. Inform clearly. Act in time.

What we screen

General Health

- Growth & BMI
- Allergies
- Respiratory health
- ENT observations
- Skin & general well-being

Dental Health

- Teeth & gums
- Enamel health
- Sensitivity
- Tooth alignment
- Early dental concerns

Eye Health

- Vision clarity
- Colour perception
- Eye alignment
- Visual strain
- Other eye health indicators

Care you can count on

Screenings are conducted by qualified and experienced healthcare professionals using structured assessment criteria for every student.

- **Medical practitioners**
- **Dentists**
- **Eye-care professionals**

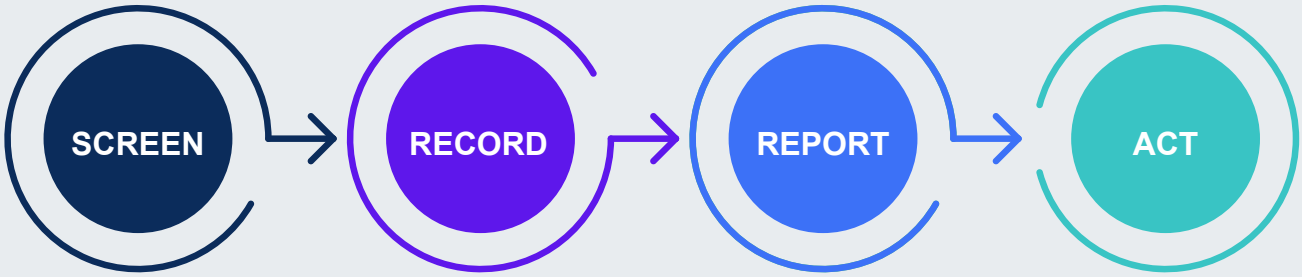

This creates a consistent screening process across the school while giving every child individual attention.

We don’t stop at the health check-up.

A health screening becomes truly useful when its findings are recorded, understood, and acted upon.

That is why HealthPRO Mission manages the journey from the first assessment to the final health insight.

On-campus health screening

Our healthcare team conducts the assessments at your school, with the programme planned around your timetable to minimise disruption to classes.

Individual student health record

Findings are systematically documented, creating a structured health record for each student.

Digital health report for parents

Every child receives an individual health report with clear observations and recommendations for further attention wherever required.

Consolidated school health report

School leadership receives an overall view of health patterns across the student community to support future planning and interventions.

One programme. Multiple benefits.

For students

Early identification of possible concerns and better support for their overall health and well-being.

For parents

Clear, meaningful information about their child’s health and guidance on areas that may need further attention.

For schools

Structured student health records and broader insights into areas such as growth, vision, dental health, allergies, respiratory health, and general well-being.

Because the real value isn’t just in conducting a health check-up.
It’s in knowing what to do with what you find.

Built for schools. Relevant across boards.

HealthPRO Mission can be implemented across CBSE, CISCE, State Board, and other school systems as a structured approach to student health screening, documentation, and preventive care. For CBSE schools, annual student medical check-ups are specifically addressed in the CBSE Affiliation Bye-Laws 2018.

CBSE Affiliation Bye-Laws | Clause 14.6
"The school shall arrange the medical check-up of the students at least once every year and keep a proper record of the same."

HealthPRO Mission helps schools put this into practice through an organised programme that combines screening, individual health records, parent reports, and school-level health insights. For schools affiliated to other boards, the programme provides the same structured framework for making preventive student healthcare a meaningful part of the school ecosystem.

WHAT HealthPRO BRINGS TO YOUR SCHOOL

- **Comprehensive student health screening**
  General health, dental, and eye assessments
- **Qualified healthcare professionals**
  Structured assessments conducted on campus
- **Individual digital health reports**
  Clear observations for every child and parent
- **Student health records**
  Organised documentation for continuity of care
- **Consolidated school health insights**
  A broader understanding of your student community's health
- **Seamless implementation**
  Planned around your school with minimal disruption to learning

Let's build a healthier school together.
